

31st May 2020

Dear TFA Solar Team,

This is a brief note to tell you how impressed we were with the performance of our solar/battery set-up during the black out a couple of nights ago.

The switching in of power from our batteries was very quick, with only the briefest moment of darkness. In fact, we realised that there was a blackout only when the stove did not cook our evening meal. And with lights still working and a microwave to hand, we did not have to retrieve our kerosene lamps and fuel stove.

Anyway, we finished the evening with six lights still glowing on the Selectronic display.

So, in all of the circumstances, a very pleasing outcome. Well done TFA Solar!

Cheers,

A & K
Ashton
